Read the questions carefully and follow the instructions.

Answer *all* the questions given below.

1. (a) Transcribe the following words : $2 \times \frac{1}{2} = 1$
(i) Container (ii) Orange.
- (b) Identify the following words : $2 \times \frac{1}{2} = 1$
(i) {Kla:(s) K } (ii) /blu: /
2. How many syllables are there in each of the following words ? $4 \times \frac{1}{2} = 2$
(a) Beautiful (b) Concrete
(c) Eye (d) Examination.

3. What are oral sounds ? 1
4. Read the passage carefully and answer the questions that follow :

A tornado is a very violent wind, in which the air whirls rapidly upwards in a greyish funnel-shaped cloud, with its tip near the ground. It twists and sways in the sky like a diving thing and moves in a straight line over the countryside at about 6 to 30 mph. No one knows exactly what starts a tornado, but it certainly happens when extremely hot moist air meets cold dry air. When the two kinds of air have to pass each other they get locked together and the hot air spirals upwards more and more quickly until it may be whirling round at between 400 to 500 mph. Usually tornadoes are over small areas. They are not as extensive as hurricanes.

Tornadoes do a vast amount of damage, even though they seldom last for more than an hour or two. The speed of the whirling air makes quite small things such as grains of sand into dangerous weapons. Once, in America, a corn cob, picked up by a tornado was shot through a horse's skull and killed the horse. The hot air spiralling upwards sucks up everything in its path rather as a vacuum cleaner does. Tornadoes have been known to tear steel bridges from their foundations, uproot large trees and lift trains off their tracks. People and animals have been lifted and carried away some distance by tornadoes. Once, a horse, for example, was picked up, carried 2 miles and pulled down again unhurt. Queer things happen such as corks flying out of bottles and closed boxes and houses exploding as the air within them rushes out with great violence.

Questions :

- (a) A tornado twists and sways in the sky like
- (i) a sinking object
- (ii) an eagle
- (iii) a diving thing. 1
- (b) What is a tornado ? How do tornadoes move ? 1
- (c) Once in a tornado, what happened to a horse ? 1

5. Read the following passage and answer the questions that follow :

One day Ranjit Singh, the Lion of the Punjab, was walking along the road with his followers. Suddenly a stone struck him on the head. His followers brought before him a very old woman dressed in rags.

The poor woman was trembling, "Your Highness," said the woman with folded hands, "my children have been hungry for three days. When I saw ripe apples hanging from the branches, I threw a stone at them. I hoped to get an apple or two to satisfy my children's hunger, but the stone missed its aim and fell on your Highness. Would you kindly forgive me ?"

The Lion of the Punjab ordered his Prime Minister to give the woman two bags of wheat and one thousand rupees. The Prime Minister stared at the king. "If the tree gave fruit when struck with stones," said the king, "then I should give much more since I am a man and have reason."

Questions :

Complete the following sentences :

- (a) The old woman was brought before Ranjit Singh because 1
- (b) The woman tried to get the apples because 1
- (c) The king decided to give her 1
6. (a) Read the first passage about the tornado, a very violent wind (Question No. 4). Write a letter to the District Collector to assist the victims of a natural disaster. 4

OR

- (b) Read the second passage about Ranjit Singh (Question No. 5). Write a paragraph on basic necessities of human life.
7. Choose the right form of the verb and complete the sentences : $2 \times \frac{1}{2} = 1$
