Time : 2 hours]

[Max. Marks : 100

Instructions to the Candidates :

1. Create a new folder on the desktop.
2. Name your Folder by your Register Number.
3. Save all your files into your folder.

Note : Answer all the 4 questions.

SECTION – I : PAGEMAKER

Question No. 1**25****Type the following passage with Font Face : ‘Times New Roman’ and Font****Size : 12****10**

Mobile App

A mobile application is a type of application software designed to run on a mobile device, such as a smartphone or tablet computer. Mobile applications frequently serve to provide users with similar services to those accessed on PCs. Apps are generally small, individual software units with limited functions. This use of software has been popularized by Apple Inc. and its App Store, which sells thousands of applications for the iPhone, iPad and iPod Touch.

A mobile application also may be known as an app, Web app, online app, iPhone app or smartphone app.

Mobile apps are sometimes categorized according to whether they are web-based or native apps, which are created specifically for a given platform. A third

category, hybrid apps, combines elements of both native and Web apps. As the technologies mature, it is expected that mobile application development efforts will focus on the creation of browser-based, device-agnostic Web applications. Mobile applications are a move away from the integrated software systems generally found on PCs. Instead, each app provides limited and isolated functionality such as a game, calculator or mobile web browsing. Although applications may have avoided multitasking because of the limited hardware resources of the early mobile devices, their specificity is now part of their desirability because they allow consumers to hand-pick what their devices are able to do.

Do the following alignments :

1. Set page size : A4 with Margins : 1" for all sides. 2
2. Format the heading with Font Face : "Arial", Font Size : "22", Font Colour : "Blue" and Align : "Centre". 2
