Question No. 1**25****Type the following passage with Font Face : ‘Times New Roman’ and Font****Size : 12****10**

CHILD LABOUR

Child labour refers to the employment of children in any work that deprives children of their childhood, interferes with their ability to attend regular school, and that is mentally, physically, socially or morally dangerous and harmful. This practice is considered exploitative by many international organizations. Legislation across the world prohibits child labour. These laws do not consider all work by children as child labour; exceptions include work by child artists, family duties, supervised training, certain categories of work such as those by Amish children, some forms of child work common among indigenous American children, and others.

Child labour has existed to varying extents, through most of history. During the 19th and early 20th centuries, many children aged 5 - 14 from poorer families still worked in Europe, the United States and various colonies of European powers. These children mainly worked in agriculture, home-based assembly operations, factories, mining and in services such as news boys. Some worked night shifts lasting 12 hours. With the rise of household income, availability of schools and passage of child labour laws, the incidence rates of child labour has been reduced.

The total number of child labourers remains high, with UNICEF and ILO acknowledging an estimated 168 million children aged 5 - 17 worldwide, were involved in child labour in 2013. Agriculture in India is the largest sector where many children work at early ages to help and support their family.
